Semester: I

Regulation (Year)	Paper Code	Title of Paper	Course Outcome
2019	ELS1C02C0 2	Microcontroller Based system Design	On successful completion of the course the students will be able to: 1. Clear ideas about Microcontroller 2. Differentiate between Timer and controller Good knowledge about microcontroller interfacing IC
2019	ELS1C03	Modern Digital & Optical Communication	Upon the completion of the course, • The student will be able to do noise and error analysis on fiber optics communication Basics of signal propagation through optical fibers, component, devices and system design
2019	ELS1C04	Advanced Digital System Design	To understand Design of sequential logical circuits. To explain design of PLD and FPGA.
2019	ELS1C01	Applied Mathematics	To solve problems using numerical methods. •To learn the basics of Probability and Random variables

Semester: 2

Regulation (Year)	Paper Code	Title of Paper	Course Outcome
2019	ELS2C06	Wireless Communication	<ul style="list-style-type: none">Identify various propagation effects.To have knowledge of the mobile system specifications.Classify multiple access techniques in mobile communication.Outline cellular mobile communication standards. Analyze various methodologies to improve the cellular capacity
2019	ELS2C05	High Performance Communication	Upon the completion of the course, <ul style="list-style-type: none">Solve the challenges of High Speed Networks and its related performanceCommunicate effectively the principles used in High Performance computing.Explain the major techniques involved, and networks & systems issues for the design and implementation of High Speed networks.Describe the key components and technologies involved and to gain hands-on experiences in building state-of-art network design applications

2019	ELS2 C 07	Design of Embedded system	<ul style="list-style-type: none"> The students will be able to understand concept of processor design. To explain concept of embedded system in processor

Semester: 3

Regulation (Year)	Paper Code	Title of Paper	Course Outcome
2010	DP3C02	Advanced digital signal processing	The students will be able <ul style="list-style-type: none"> To understand concept of signal processing To explain digital signal design layers To explain concept of signal correction
2010	ES3C 01	Embedded systems	<ul style="list-style-type: none"> The students will be able to understand concept of processor design. To explain concept of embedded system in processor
2010	VL3 C 03	VLSI Design, Tools & Technology	Upon the completion of the course, Identify the various IC fabrication methods. <ul style="list-style-type: none"> Express the Layout of simple MOS circuit using Lambda based design rules. Apply the Lambda based design rules for subsystem design
